EBELTOFT

New – Ebeltoft stone tiles

Discover the details

Sharpness & imperfections

A refined structure technology brings out the imperfections in natural stone with sharpness and clarity. Details like cracks and fossils set into the stone make the realistic look complete.

A premium look

Ebeltoft offers a modern, high-end look highlighted by the absence of grouting between tiles. The subtle variations in gloss add character and reflect the light in a vivid, natural way to complete the exclusive impression.

Warm and smooth

Now you don't have to worry about the noise or hard feeling of a stone or ceramic floor anymore. Our Ebeltoft floors are comfortably smooth and warm to walk on.

Water-resistant and easy to install

Made for a carefree life the new Sensation floors have surface protection that covers the entire surface, even into the bevels. AquaSafe technology brings water-resistance, and the easy installation brings a perfect result with a couple of clicks. Ebeltoft is everything we want a Pergo floor to be – made for real life.

The AquaSafe logo consists of the word "aqua" in a lowercase, sans-serif font above the word "safe" in a similar font. A stylized wave graphic is positioned between the two words. The logo is white and set against a black rectangular background.

aqua
safe

Life is too short to worry about water!

The AquaSafe technology creates a sealed, 100% water-resistant surface, that extends all the way down into the bevels. This efficiently prevents water from penetrating the floor.

And not only that, it makes your floor equally resistant to dirt and stains. Like water, they simply stay on the surface and can be wiped away easily.

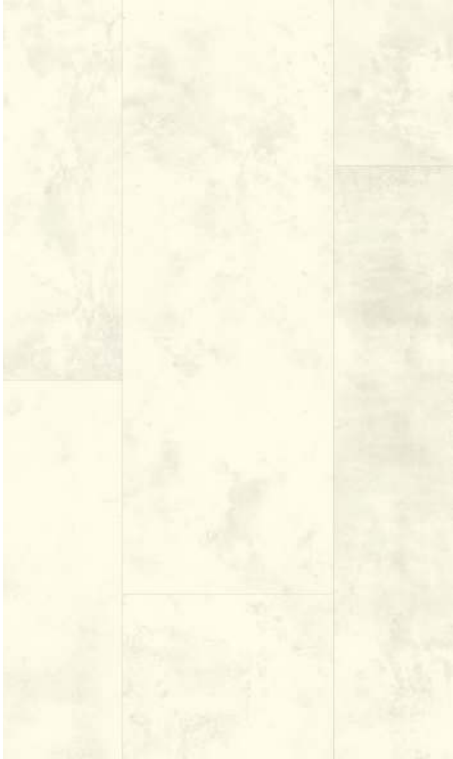

With AquaSafe taking care of the floor,
our accessories for a water-resistant
finishing seal the deal on your new interior.
